

SANISPORT/SANIDEFENX

SAFELY AND EFFECTIVELY REMOVE BACTERIA & HARMFUL PATHOGENS FROM PROTECTIVE ATHLETIC GEAR

Athletic equipment is a perfect breeding ground for MRSA, c. diff, influenza and many other harmful bacteria. If bacteria is present in or on protective athletic gear, it can enter the bloodstream through an open cut and cause a life-threatening infection. These infections are contagious and can be transmitted through direct physical contact. SaniSport/SaniDefenx uses a patented ozone technology to significantly reduce bacteria and odors on protective gear. Ozone is 3,200 times more powerful than bleach!

SANITIZE. DISINFECT. PROTECT.

- Easy system—just place the gear on the machine shelves and start the machine!
- Quick 12-minute ozone cycle
- Suitable for all athletic equipment and protective gear:
 - Helmets • Skates • Gloves
 - Cleats • Shoulder Pads
- Extends life of athletic equipment
- No consumables liquids!
- Waterless System – No piping, drains or extra hookups
- 100% stainless steel and rust-proof cabinet
- 4 caster wheels provide easy mobility
- Drimax system: Optional add-on system which works to dry the equipment during the 12-minute cycle

ELECTRICAL

- Standard 110v, 5 amps
- Third party safety certifications

SPECIFICATIONS

- 35 cubic ft. load capacity
- Dimensions: 23" deep X 45" wide X 67" high
- Weight 400 lbs

FINANCIALS

- Cost per cycle = \$0.02
- Average charge to sanitize one set of football or hockey equipment = \$30
- Supreme machine can sanitize 2 sets of hockey or football equipment simultaneously — making the revenue per cycle approximately \$60!

SANISPORT/SANIDEFENX VE

AUTOMATICALLY CLEAN BACTERIA AND PATHOGENS FROM AMBIENT AIR AND ALL HARD SURFACES

Perfect for locker rooms, coaching offices, weight rooms and training areas, SaniDefenx VE effectively cleans everything in the room including the ambient air by combining ozone and accelerated hydrogen peroxide to reduce harmful bacteria on all surfaces. The vapor generator, high-velocity distribution nozzle and cyclone fans provide an even distribution of Hydrogen Peroxide to all areas of the room enclosure to maximize contact with pathogens.

3 PRESET CYCLES TO CHOOSE FROM

S (Short)	30 minutes	Room under 600 sq. ft.
M (Medium)	60 minutes	Room under 600-1000 sq. ft.
L (Long)	90 minutes	Room under 1000-1600 sq. ft.

SaniDefenx VE can also be set manually to run up to 240 minutes to treat areas up to 4,000 sq. ft.

FEATURES

- Combines ozone and accelerated hydrogen peroxide to reduce:
 - Staphylococcus aureus
 - Staphylococcus aureus MRSA
 - E. faecalis
 - Clostridium difficile
 - Mumps Virus
 - MERS
 - Influenza
 - Plus Many More
- The VE will sanitize everything in the room
 - Ambient Air
 - Door Handles
 - Chairs
 - Walls
 - Telephones
 - Desks
 - Floors
 - Ceilings
- The vapor generator, high velocity distribution nozzle and cyclone fans provide an even distribution of Hydrogen Peroxide to all areas of the room enclosure to maximize contact with pathogens
- Hydrogen Peroxide Vapor decomposes to oxygen and water vapor so the bio-decontamination process is residue-free
- The VE is easily transported due to 4 caster wheels and it's compact nature

SPECIFICATIONS

- Dimensions: 30.5" deep X 11" wide X 24.25" high
- Weight 400 lbs.

ELECTRICAL

- Standard 110v, 5 amps
- Third party safety certifications: CE & UL
